

Texas School of the Arts

THIRD GRADE SUMMER MATH HOMEWORK

Hello, incoming third grader!

I want to give you a little practice so you can remember concepts learned in second grade, and be ready for the next year! This packet was not made overnight, so I do not want to complete it in one night.

PLEASE JUST DO A LITTLE EVERY WEEK.

DO NOT WAIT UNTIL THE WEEK BEFORE SCHOOL STARTS.

Be ready to turn in your packet the first day of school.

This packet will be graded.

See you in August!

Look on the next page in the packet for some awesome math ideas for you to try this summer!! I look forward to meeting you in August!

TeSA 3rd Grade Math Teacher

Some of you will complete the packet in no time at all! Here are some other things you can do to remember all those useful math facts you learned in 2nd grade.

- Use flash cards or have a parent call out addition and subtraction facts in the car or while you help prepare for lunch or dinner. (It's amazing how much easier math is when you have your single addition and subtraction facts memorized and fluent— especially the numbers that combine to make ten. This is **EXREMELY IMPORTANT!!** 😊)
- Print out extra practice from www.themathworksheetsite.com or www.k5learning.com/free-math-worksheets
- Ask to count your mom's or dad's change.
- Regularly, practice telling the time on an analog clock. (the kind with hands)
- Check the time before and after you complete an activity and figure out how much time that activity took for you to complete.
- Look for shapes when you are out running errands. You will be surprised how many shapes you can find on signs and in building designs.
- Play online math games at www.coolmath.com
- www.starfall.com has great reading and math games and practice.
- There are many free math game apps! Try several that appeal to you. 😊

How Much is Your Word Worth? Name: _____

A		B		C		D		E		F		G		H		I	
J		K		L		M		N		O		P		Q		R	
S		T		U		V		W		X		Y		Z		,	

DIRECTIONS:

On the sheet of "How Much is Your Word Worth" paper, using the value chart, determine the value of each letter and add the values of each coin to determine the total value of each word.

It may be helpful to ask for some coins to use to model each word with coins.

How Much is Your Word Worth? Name: _____

Using the value chart, determine the value of each letter and add the values of each coin to determine the total value of each word.

It may be helpful to ask for some coins to use to model each word with coins.

Challenge: Use this space to write your own words and find the total value of each chart. Use your imagination to think of interesting words. 😊
